

Aptitude Search

Find work that fits your real strengths – aptitude-driven opportunity discovery from resume to verified openings.

THE PROBLEM

Keyword job search locks you into titles and exact phrasing. Roles that fit your capabilities stay hidden when the posting uses different words than your resume.

"Built distributed backend services" ≠ "Cloud-native API development" – until meaning is understood.

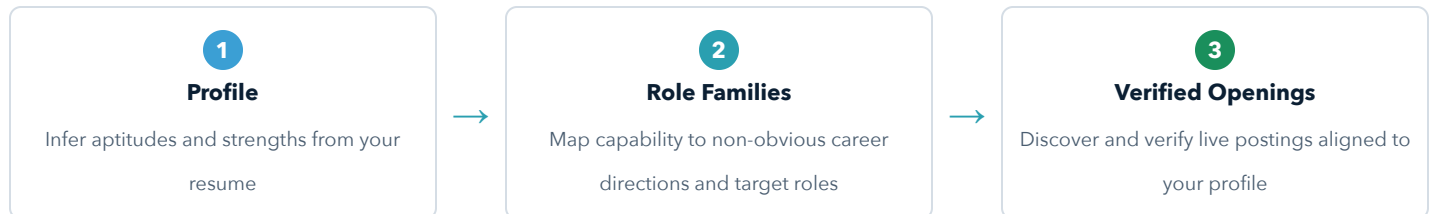

THE APPROACH

Infer what you can actually do, map that to non-obvious role families, then search the open web for verified postings that fit – not just keyword overlap.

Match capabilities, not just words.

The job market is optimized for matching words.
Aptitude Search matches capabilities.

HOW IT WORKS

WHAT YOU GET

- Non-obvious search paths
- Career direction matches
- Verified open postings
- Aptitude profile from your resume
- Target role families
- Fits beyond keyword overlap

Built For

Job seekers exploring new directions
Career changers and pivots
People with transferable skills
Anyone stuck in title-based search

DIFFERENTIATION

TYPICAL JOB SEARCH

Filter boards by job title and keywords – and miss roles that fit your strengths under different labels.

APTITUDE SEARCH

Understand what you can do, surface non-obvious role families, then return verified openings that fit those capabilities.

Discover jobs you would not find through obvious searches.

Resume → aptitude profile → role families → verified openings – all in one pipeline, grounded in what you can do.

POSITIONING

Opportunity discovery
for job seekers
